Eastern Industrial Automation, formerly known as Eastern Bearings Inc., was founded in 1963 and is New England’s largest independent distributor of Industrial Power Transmission, Bearings, Pneumatic and Motion Control Products.

We are well known throughout the country for our exceptional customer service, extensive inventory, broad engineering capabilities, global business support and integrated procurement solutions. Since 1963, we have significantly grown our business with the support of our very talented and committed employees and exceptional OEM and MRO customers.

We represent more than 1,000 leading manufacturers worldwide and supply more than 1,000,000 specific products to our customers. The broad cross-section of industries supported include; medical, semiconductor, pulp and paper, food processing, wire and cable, packaging, bottling, chemical processing, aggregate, power generation, textiles, corrugating, automotive, printing, plastics, machine tool and machine builders.

Eastern Industrial Automation offers an industry leading portfolio of In-House Engineering and Value Added Services. These services are designed specifically to exceed the changing demands of our invaluable customers; Automated Lubrication System Design, Industrial Automation Solutions, Sub-Assembly Manufacturing, Pneumatic Product System Design, Predictive Maintenance Services, Electro-Mechanical Repair Services, Motion Control Application Design, Field Installation and Maintenance Repair Services, Gearbox Repair, Supply Chain Management, International Sourcing and Supply, ROI Consultation and Documentation.

Through the years, we have learned the importance of exceeding customer expectations and as a result, our “Hybrid Distribution Philosophy” was created. This philosophy centers on the importance of delivering quality global products, exceptional technical support with the highest level of business acumen. Eastern Industrial Automation is well positioned to deliver bottom line savings—globally.
